U.S. Patent and Trademark Office PTOL-326 (Rev. 08-06)

DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) will be required in this application if it is found in condition for allowance. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because "Figure 2". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-7 & 9-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP (1,391,080) in view of Anderson (USPN 5,167,903).

EP ('080) discloses a laser cutting whereby the workpiece is supported on a knife-edged support. The support elements are constructed in the forms of strips and

Art Unit: 1725

are connected by means of pins and spacers to form a support unit. The upper part of the right hand side is beveled and for an angle (α) with the other straight side. The knife-edged support has tip angle (α) which is 6° or less. This angle obviates interfering reflections from the laser-cutting beam. The supports are made of aluminum (light weight metal) or copper. In addition, shielding gas may pass through the support element.

EP ('080) does not specific as to whether the supports (insert/slat) are removable or the presence of a void.

Anderson discloses a worktable used in conjunction with a water table.

Removable support bars are attached to a tray having an attachment cutout (i.e. a void).

The worktable may be immersed in the water or above the water during the cutting of a metal plate. The tray is connected to a conveyor.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have removable support bars and a void in the bar, as taught by Anderson in the EP ('080) system because this enhance the versatility of the system and decreased weight.

Substitution of known equivalent structures. <u>In re Ruff</u> 118 USPQ 343 (CCPA 1958).

It would have been obvious to one having ordinary skill in the art at the time of the invention to shape, size or form the prior art product any shape, size or form, because change of shape, size and form has been held an obvious variant in any art. In re Rose 105 USPQ 137.

Application/Control Number: 10/507,051

Art Unit: 1725

Changes of proportions were held obvious. <u>In re Reese</u> 129 USPQ 402; <u>In re Fields</u> 134 USPQ 242.

Making elements adjustable was held to have been obvious. <u>In re Stevens</u> 101 USPQ 284.

Rearrangement of parts was held to have been obvious. <u>In re Japikse</u> 86 USPQ 70.

Intended use has been continuously held not to be germane to determining the patentability of the apparatus, <u>In re Finsterwalder</u>, 168 USPQ 530.

The manner or method in which a machine is to be utilized is not germane to the issue of patentability of the machine itself, <u>In re Casey</u>, 152 USPQ 235, 238.

Purpose to which an apparatus is to be put and expression relating apparatus to contents thereof during intended operation are not significant in determining patentability of an apparatus claim, *Ex parte Thibault*, 164 USPQ 666.

A recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations, *Ex parte Masham*, 2 USPQ 2d 1647.

Claims 8 & 23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson in view of EP ('080).

Anderson discloses a worktable used in conjunction with a water table.

Removable support bars are attached to a tray having an attachment cutout (i.e. a void).

Art Unit: 1725

The worktable may be immersed in the water or above the water during the cutting of a metal plate. The tray is connected to a conveyor.

Anderson does not specifically teach the fold of the support.

EP ('080) discloses a laser cutting whereby the workpiece is supported on a knife-edged support. The support elements are constructed in the forms of strips and are connected by means of pins and spacers to form a support unit. The upper part of the right hand side is beveled and for an angle (α) with the other straight side. The knife-edged support has tip angle (α) which is 6° or less. This angle obviates interfering reflections from the laser-cutting beam. The supports are made of aluminum (light weight metal) or copper. In addition, shielding gas may pass through the support element.

It would have been obvious to one of ordinary skill in the art at the time of the invention to fold or angle the support, as taught by EP ('080) in the Anderson system because this angle/fold angle obviates interfering reflections from the laser-cutting beam.

Substitution of known equivalent structures. <u>In re Ruff</u> 118 USPQ 343 (CCPA 1958).

It would have been obvious to one having ordinary skill in the art at the time of the invention to shape, size or form the prior art product any shape, size or form, because change of shape, size and form has been held an obvious variant in any art. In re Rose 105 USPQ 137.

Changes of proportions were held obvious. <u>In re Reese</u> 129 USPQ 402; <u>In re Fields</u> 134 USPQ 242.

Making elements adjustable was held to have been obvious. <u>In re Stevens</u> 101 USPQ 284.

Rearrangement of parts was held to have been obvious. <u>In re Japikse</u> 86 USPQ 70.

Intended use has been continuously held not to be germane to determining the patentability of the apparatus, <u>In re Finsterwalder</u>, 168 USPQ 530.

The manner or method in which a machine is to be utilized is not germane to the issue of patentability of the machine itself, <u>In re Casey</u>, 152 USPQ 235, 238.

Purpose to which an apparatus is to be put and expression relating apparatus to contents thereof during intended operation are not significant in determining patentability of an apparatus claim, *Ex parte Thibault*, 164 USPQ 666.

A recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations, *Ex parte Masham*, 2 USPQ 2d 1647.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Alexandra Elve whose telephone number is 571-272-1173. The examiner can normally be reached on 6:30-3:00 Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
